

# XMU-China iGEM 2022 队员周报

校区： 翔安校区 年级： 2020 日期： 3/13

## 一、课题设计相关内容

这两个星期在学习进度条的设计。参考了一下大概有两种形式，横条和竖条。第一种如 Vilnius-Lithuania 团队的设计，进度条在最右，随着页面的拖动实现进度条的填充。另一种是横条的进度条，将进度条放在最上方进行查看，个人觉得也是比较清晰的。目前学习了一下横条进度条的代码。

## 二、实验进度内容

横排的进度条做了一种，尝试了一下将进度条和目录结合。文字排版，字体设计等还需要慢慢磨，可能会再花一个星期的时间。进度条上的动画可以根据 igem 的实验内容进行调整，以及如果是海洋背景的话，可以学习一下气泡的动画代码。

具体代码已传到 GitHub，没有做响应式布局，所以如要预览，请在电脑打开。响应式布局可能会在网页整体布局设计好后一起弄。

代码：<https://github.com/ryanregal/IGEM-Readbar-test>

## August

When Emma had been on her own as a kid, she'd learned to love the **summer**.

**Summer** had meant being warm without the aid of coats and blankets she couldn't afford, had meant no one would look twice at a teenager wandering around alone during school hours, had meant bicycles left outside houses that it had been easy to borrow, just for as long as she'd needed them.

## September

It doesn't go away, though it doesn't darken, either. Emma is trapped in a curious sort of limbo with it, and she's glad when it's finally **autumn** and she has an excuse to wear jackets again that mostly conceal the mark.

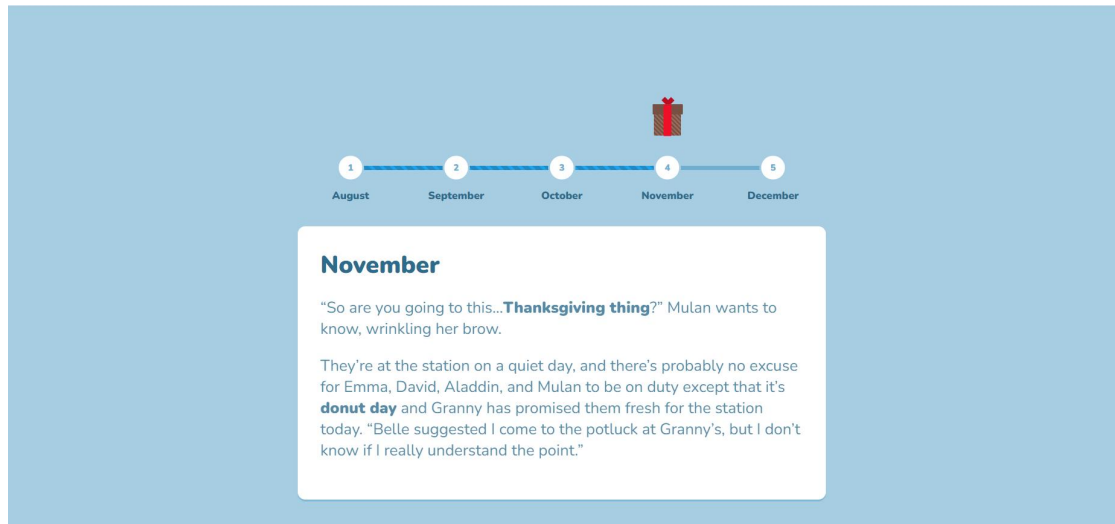

Regina doesn't ask about it again, though she does say threateningly when they're back-to-school shopping, "If you ever dress Henry in an eyesore like that jacket..."

## October

**The mark** seems darker when she peers at it now, and she angles herself right up against the mirror in her apartment to try to read it.

It's still just a scribble, grey like latticework under her skin, and when she touches it, she feels an odd lurching in her stomach.

### 三、代码说明

网页填充文本用了 Archive of Our Own 上 coalitiongirl 老师的一篇文章，最近被基友安利了很多文，苦于没有时间看，于是这次实验干脆用这篇文章当填充文本，仅供学习用。
